Location: Warsaw

SUMMARY

Unity Developer with 4+ years of commercial experience building cross-platform games, including Android and iOS mobile projects. Experienced in C#, scalable architecture, performance optimization, LiveOps, networking, Addressables, Unity Profiler, and Frame Debugger. Experienced in developing and maintaining commercial game projects and shipping mobile games.

TECHNICAL SKILLS

Game Development: Unity, C#, 2D, uGUI, URP/HDRP, OOP, Design Patterns

Performance & Architecture: Unity Profiler, Frame Debugger, Addressables, Asset Bundles, Zenject (DI), SOLID

Mobile & Platforms: Android, iOS, Xcode, Google Play Store

Networking & Services: Photon PUN 2, Photon Quantum, Firebase, Steamworks

Tools & SDKs: Git, HLSL, .NET, UniTask, DOTween, Cinemachine, Feel, AdMob, IronSource, AppsFlyer, Tenjin

WORK EXPERIENCE

OpenSkies Games — Unity Developer

Oct 2025 – Aug 2026

- Developed mobile Android projects from scratch using scalable architecture based on Zenject (DI) and SOLID principles.
- Implemented HLSL shaders for URP and optimized rendering while developing visual effects directly in code.
- Created reusable Core modules to support rapid deployment and logic reuse across new game iterations.
- Integrated and configured advertising mediation with AdMob and IronSource and marketing analytics systems with Firebase, Facebook SDK, and Tenjin.
- Managed memory and optimized bundles using Addressables to support efficient resource management.
- Configured and used Unity tooling including Cinemachine, UniTask, DOTween, and Feel.

AlphaNova — Middle Unity Developer

Oct 2024 – Oct 2025

- Supported and developed new features for large-scale cross-platform projects across PC, PlayStation, and Mobile in an outstaff environment.
- Fixed complex Photon Quantum desynchronization bugs and configured stable network performance for players with high ping across regions.
- Managed memory and optimized bundles using Addressables.
- Supported and integrated Firebase and Steamworks for cloud saves, achievements, and analytics.
- Configured and used Unity tooling including Cinemachine, UniTask, DOTween, and Feel.

GoTeens — Unity Gamedev Teacher & Course Developer

May 2024 – Present

- Created a complete GameDev course curriculum covering more than 160 lectures and practical sessions.
- Mentored and taught programming from scratch to groups of 15+ students, adapting OOP and architectural patterns for beginners.
- Developed constructive feedback and communication practices while managing group dynamics.

QPLAZE — Unity Developer

May 2023 – Oct 2024

- Refactored legacy code, fixed bugs, and maintained large-scale commercial game projects.
- Analyzed and optimized CPU/GPU performance using Unity Profiler and Frame Debugger, including sprite atlas packing and draw-call reduction.
- Minimized build sizes using Asset Bundles and supported resource optimization in existing projects.
- Supported multiplayer logic and fixed networking bugs in existing projects using Photon PUN 2.

- Implemented and configured localization systems in fully operational products.

Soulma — Unity Developer

Nov 2022 – May 2023

- Developed casual 2D mobile games for iOS in the iGaming sector.
- Programmed core gameplay logic and mechanics for 2D games.
- Created adaptive UI for different Apple device screen resolutions using uGUI.
- Implemented UI animations and effects using DOTween.
- Optimized graphical assets and prepared final project builds for Xcode.

Freelance — Unity Developer

May 2022 – Nov 2022

- Developed and published an indie 2D mobile game on the Google Play Store, managing the full build and submission process.
- Developed gameplay logic and adaptive UI for 2D mobile games.
- Handled technical tasks and bug fixes to support project milestones.
- Collaborated with an indie development team on game mechanics and project development.

EDUCATION

Lviv Polytechnic National University — Bachelor's Degree in Computer Engineering

2022 – 2027 (Expected) · Individual Study Plan
